

Lightweight 4-Cylinder Really Goes

HONDA
CB-350FOUR

Smooth, Quiet, Easy Riding, Long Trip Stamina

Alloy 4-stroke
Four engine
produces 34
bhp plus strong,
flat low and
medium speed torque

matched perfectly to smooth 5-speed gearbox. Pre-chamber between air filter and 4 carbs improves breathing and cuts intake roar. Trouble-free, reliable engine with a very long life.

Large matched tachometer and speedometer with trip meter are at the angle easiest for the rider to read.

Accurate, steady needles, back-lighted dials. Warning lamp panel for turn signals, oil pressure, gear box neutral and headlamp high beam let you know what's happening.

Honda introduced disc brakes for motorcycles, and this powerful front stopper gives unbelievable braking force with plenty of feeling feedback and without fading. Cover keeps it from flinging water on engine, rider.

This is the motorcycle that brings superbike performance to the best-selling lightweight class. Four cylinders, four synchronized carbs, four upswept mufflers, five speeds and a quick-stopping disc brake. All perfected by thousands of its 750 and 500 big brothers. The CB-350 Four is the prince of Honda's four-cylinder series of superbikes. This price is smooth and quiet. It's compact and light for easy handling. Yet it pours out plenty of power and superb low and medium speed torque for superbike performance. You get a multitude of design detail, too, such as lockable helmet holders, motor-cycling's first fast-idle handiebar kill switch, main and auxiliary double trochoid oil head orifice valve, and positive stopper

SPECIFICATIONS

Horsepower 34 bhp @ 5,500 rpm
Engine 347 cc B10C Four cylinder, transverse in-line 4-stroke, air-cooled alloy
Carburetors Four 20 mm piston valves
Starting Electric push button or Kick
Transmission 5-speed
Frame Semi-double track tabular

Dimensions 2,040 x 780 x 1,090 mm
(81 x 31 x 43 in.)
